

Mitra Finance

Empowering Rural Financial Inclusion

Business Objectives

- **Bridge the Credit Gap:** Provide formal credit to 'New-to-Credit' rural populations
- **Empower Bank Mitras:** Digital tools for KYC and loan origination in the field
- **Linguistic Inclusion:** Voice-first GenAI in local dialects to overcome literacy barriers
- **Secure Trust:** AI-driven biometric verification for assisted banking

AI in Direct Benefit Transfer

Fraud Checks

- ID Verification
- Transaction Monitoring

Beneficiary Impact

- Efficient Distribution
- Reduced Leakage

Context & Challenges

- **Tier 2/3 Gap:** Massive shortage of physical bank branches in remote villages
- **Connectivity:** Spotty 4G/3G signal and intermittent power outages
- **Documentation:** Lack of formal income proof or tax records
- **Trust:** Users prefer human face (Mitra) over cold apps

Key Requirements

- **Assisted Loan Origination:** Mobile module with OCR and low-bandwidth upload
- **GenAI Credit Assistant:** Bot that interviews users in dialects
- **Alternative Risk Scoring:** AI engine using non-traditional data (utility bills/Regional Met data, Drought/Flood reports)
- **Compliance:** DPDP Act adherence with strict consent and role-based access
- **Offline Sync:** Consider Store and Forward architecture

Features

- Multi-lingual voice interface supporting 12+ Indian dialects
- Real-time biometric authentication with fallback mechanisms
- Integration with UIDAI Aadhaar and ABHA health records
- Loan workflow engine with approval routing

Constraints

- **Offline-First:** 100% functionality during network outages with auto-sync
- App load time under 5 seconds on 3G network
- End-to-end encryption with biometric multi-factor authentication
- Support 10,000 Bank Mitras serving 5 million rural customers
- 99.5% uptime with graceful degradation during connectivity loss
- RBI guidelines, DPDP Act, KYC/AML regulations adherence

Nice To Have Features

- **Visual Asset Verification:** Computer Vision for livestock or crop health assessment
- **CBDC Integration:** Central Bank Digital Currency for offline digital rupee payments
- **WhatsApp Debt Counselor:** Automated voice-reminders for EMIs in local languages

Expected Deliverables

- **Architecture Diagram:** System design showing offline-first and AI components along with Flow d
- **Technology Stack:** Web, Mobile frameworks, cloud services, databases
- **Security Design:** Data protection, biometric auth, and compliance strategy
- **Agents:** AI Models, LLMs, Data Frameworks and Processors

Evaluation Criteria

- Offline-first architecture feasibility and data synchronization strategy
- AI/ML approach for dialect support and credit risk assessment
- Maintenance and Upgrade feasibility
- Security, privacy, and regulatory compliance considerations
- Scalability and cost-effectiveness for rural deployment

Empower Rural India!

Architect the future of financial inclusion

Design. Innovate. Transform.
